

Film Applicator with 2 Gaps, bar-shaped

Multiple Clearance Applicators are designed for the production of uniform films of paints, adhesives and similar products on plane substrates. They combine the accuracy of fixed applicators with the versatility of multiple clearance / gap choices in one unit. These applicators are suitable for use of aqueous, acid, and alkaline products.

How to choose the right applicator:

- Low viscous paint: applicator frame
- High viscous paint: 4-sided or bar applicator
- Flexible substrates like foils: wire wound applicators

Catalog Number	Short Description	Gap Clearance		Film Width	
5302	Double Bar 2", 6&10 mils	<ul style="list-style-type: none"> • 6 mil • 10 mil 	<ul style="list-style-type: none"> • 152 µm • 254 µm 	<ul style="list-style-type: none"> • 2 in 	<ul style="list-style-type: none"> • 5.1 cm
