Aluminum Spray Out Cards

These Aluminum Spray Out Cards feature close color tolerances on the black and white areas to ensure batch-to-batch consistency, rounded corners with one hole for easy hanging or mounting, and is individually laminated with a protective film to maintain a clean, consistent surface. No UV brighteners are used in the black and white coated areas to ensure accurate color measurement of coated panels.

Perfect for

- Color database development
- Color standard spray outs
- Body shop color libraries
- Weathering exposure
- Salt spray & corrosion testing
- Quality control of coatings
